Summary

I am Software Engineer with over 5 years of experience in software development and project management. My passion tends to land on progressive website and mobile app and desktop app with React, Angular, Vuejs and other advanced JavaScript frameworks. I've started working with web development, desktop development and mobile development 5 years ago. So that I have 5 years of experience with making responsive website applicable both in desktop and in mobile I also take great care & interest in creating position in back-end development with my strong experience with PHP, Node.JS, SpringBoot, Django, NestJs, NoSQL such as MongoDB and relational databases such as PostgreSQL, Mysql, Sql... with complex taxonomies.

I can help you with the following skills to achieve your goal.

1) Web Development

Frontend:

PHP (Laravel, CodeIgniter..)

JavaScript (React, Vue, Angular, Ext..)

Python (Django)

Ruby (Ruby on rails)

Backend:

PHP(Laravel)

Java(Spring boot)

Javascript (NodeJs[ExpressJs, Socket.io], NestJs)

Python(Django, Flask)

Ruby (Ruby on rails)

2) Mobile Development

Java, React Native, Flutter, Kotlin

3) Desktop App Development

Electron, ReactNative, Flutter

Best Regards,

Experience

Fullstack developer at ganira250 (ganira250.com) (June 2022 - August 2022)

This project is online newsletter.

Products:

- News around the world
- Advertisement

Technical stacks:

- NextJs
- NodeJs, ExpressJs

Project duration: 2 months

Fullstack developer at ObereaguVenture (Sept 2022 - October 2022)

This project is online newsletter.

Products:

- News around the world
- Advertisement

Technical stacks:

- NextJs
- NodeJs, ExpressJs

Project duration: 2 months

Finished but still in testing
